

Googling God - the questions everyone has but no one dares to ask

Week 1 - Does science contradict faith?

Getting started

Open up by asking people what questions they've had of God in the past and maybe some they still have of God now? (*Fun and more serious*)

Getting stuck in.

- When it comes to faith and science, what are some of the common questions people ask?
- What's been your journey with this subject? It may be it's never been an issue for you it may be that it really has!

No judgement just honest, open conversation.

Read Genesis 1 v. 1-5 then Read John 1 v. 1-5

- What strikes you from these passages especially reading them both?
- What questions do they cause in peoples minds do you think?

Consider the 4 points brought out Sunday...

1. Science and faith have more in common than people think
2. The people who should feel the tension often don't
3. Science is amazing but it isn't everything
4. Science is a gift from God and a gift that points to God

- Which of these raises the most questions for you still?
- Which of these would you like to explore further?
- Which of these encourages you the most?

Getting personal

- How would you approach sharing your faith with someone who had questions around science and faith? Does anyone have any stories or testimonies like this?

Finish by spending some time in worship...maybe find a YouTube song with images of creation and marvel again at Gods handiwork that points to his creation...

Pray for one another especially if people have questions that are concerning them

Pray for those we know who aren't yet followers of Jesus that they would explore God for themselves.

Series runs 16th April - 14th May
